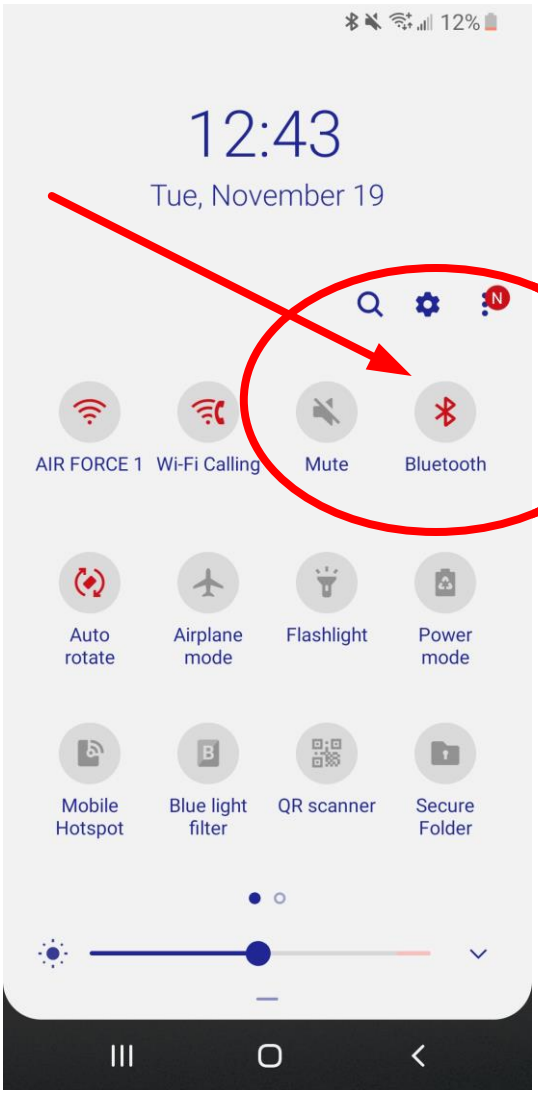
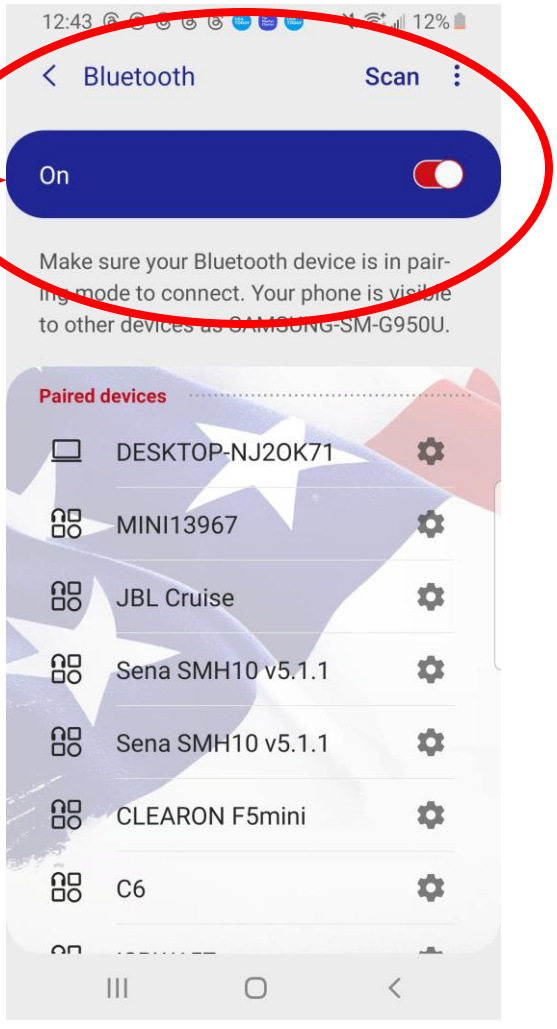
On the phone find settings and Bluetooth



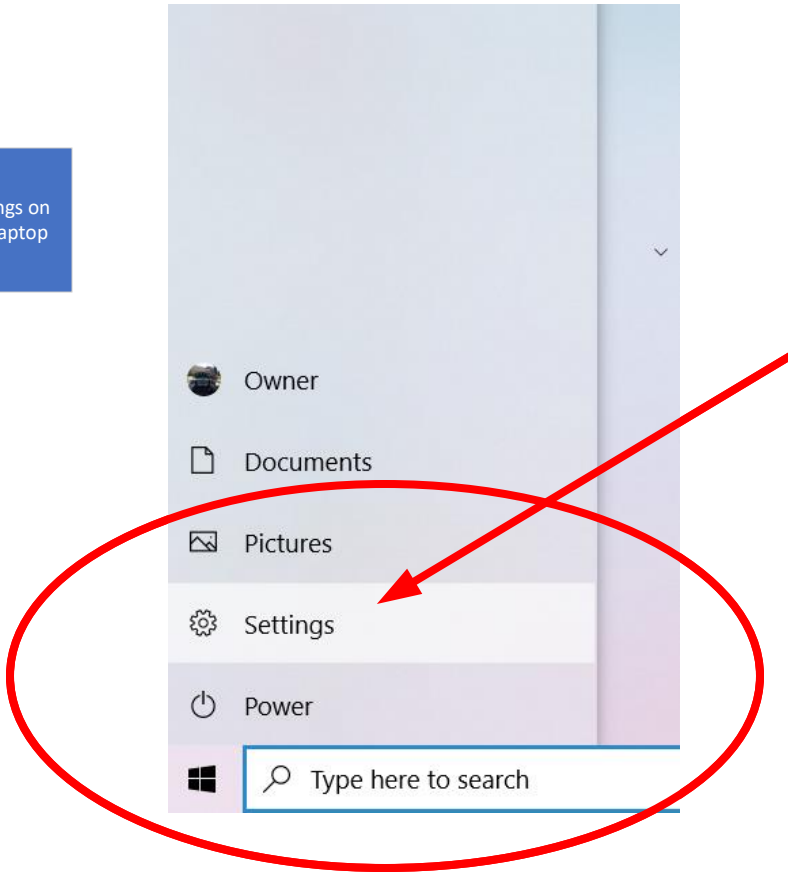
Turn Bluetooth on if it isn't already enabled



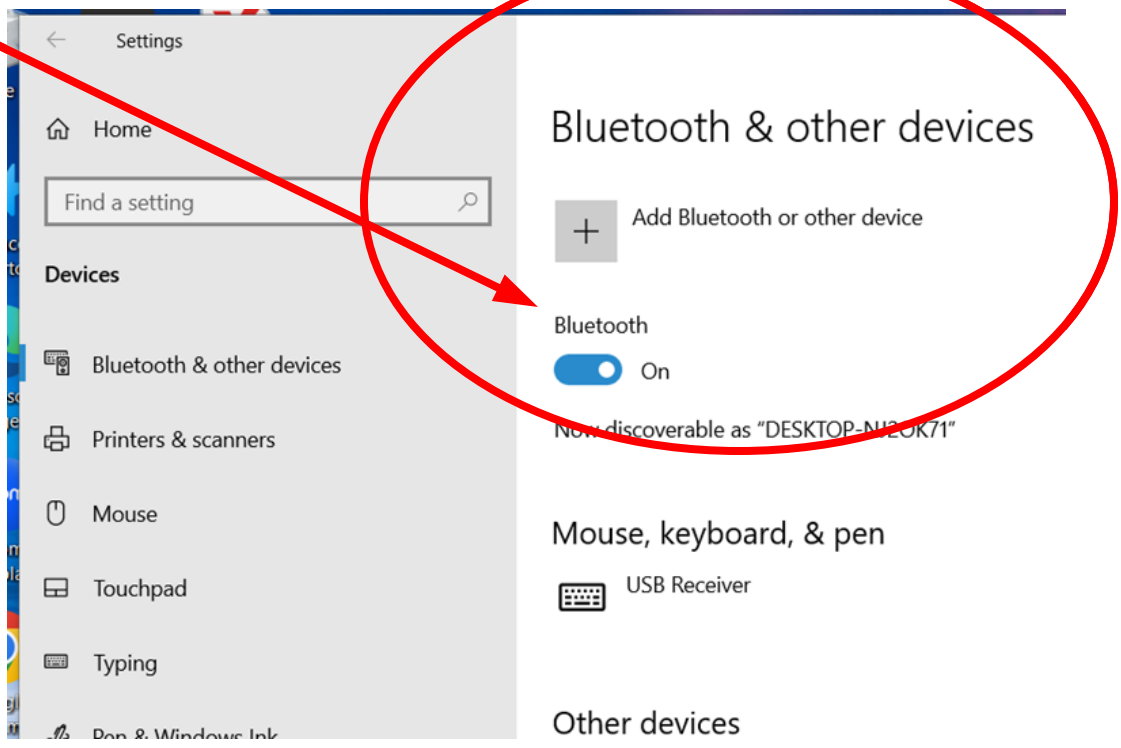
Note:
At some point the user will be asked for permissions to sync messages, contacts, and notifications on the phone and/or computer.
The user must to grant the permissions for the program to operate.

The Phone Link program should do the pairing but it is possible to pair on the phone as well.

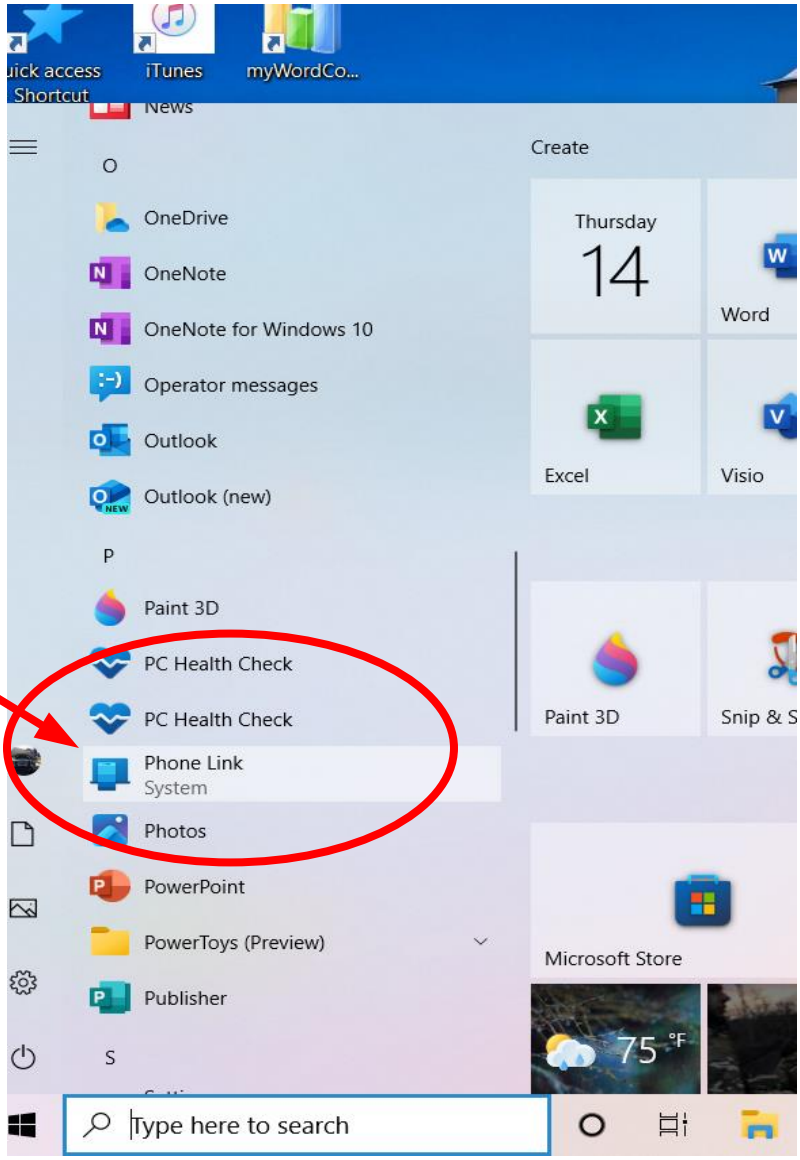
Go to Settings on the PC or Laptop



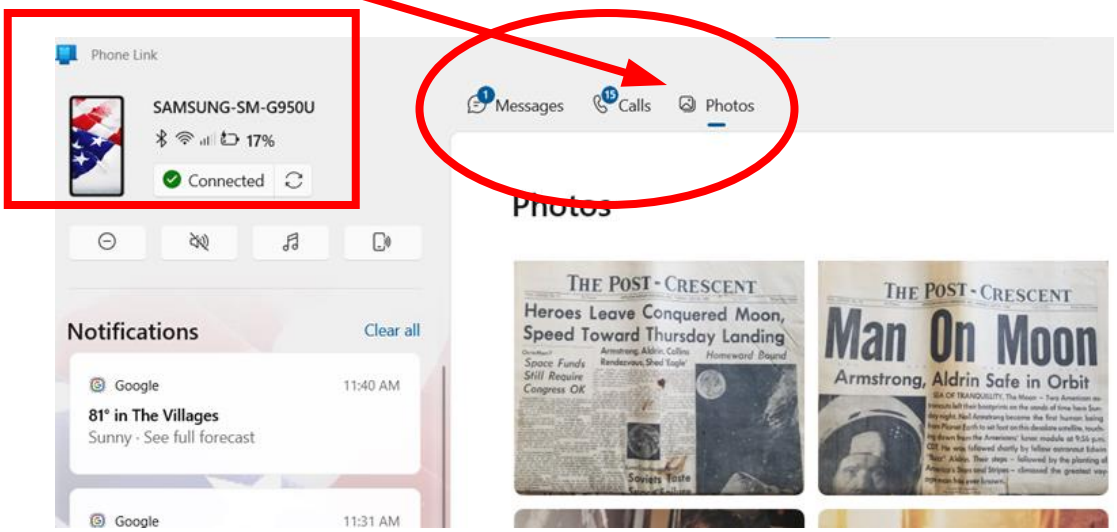
Turn Bluetooth on



On the PC,
Find the Phone Link
Program

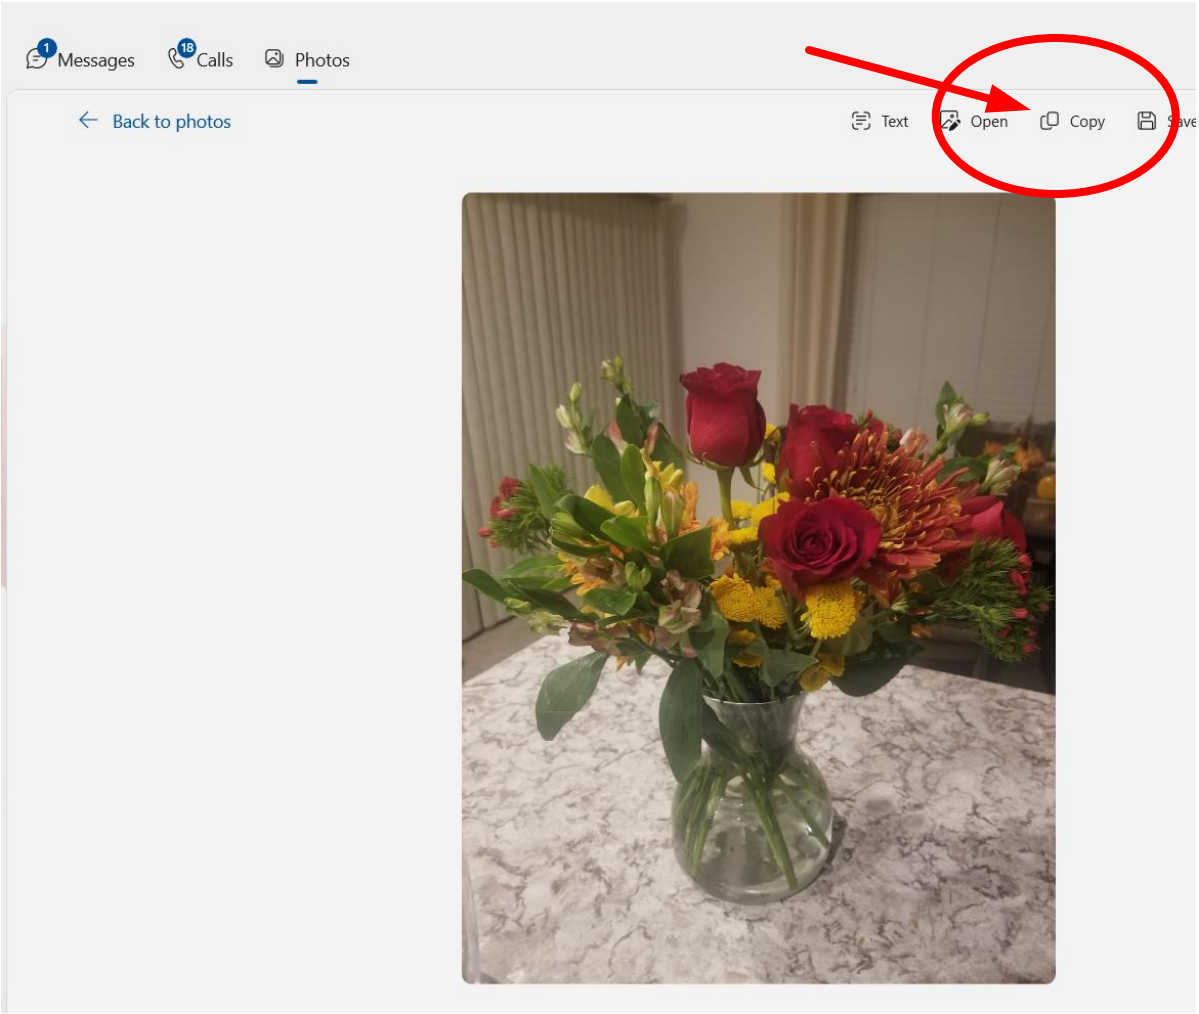


Go to the Photos tab



Double Click on the Photo

Select Copy. Then you can paste into any document



Note:
Phone Link also snycs messages and the phone so the user may also text and make phone calls
